

Team name: Team SmartMirror

Members present: Michael Dykema, Josue Nunez

Date: 10/25/2020

Time: 9:00pm

Discussion Points:

- **Michael** installed some existing modules to test them out.
- **Michael** thinks he can just add a folder to the existing repo for our custom modules and install them that way.
- **Michael** hasn't made much progress on the custom Disc Golf module as life was busier than expected this week.
- **Josue** assembled the frame this week.
- **Josue** added SSH to his pi/laptop
- **Josue** installed MM^2 onto his pi and began working on the weather module
- Midterm Presentation on Wednesday 10/18/20. Meeting again on Monday, 10/26 to go over responsibilities. Things to assign:
 - Introduction
 - Use cases
 - Timeline
 - Progress (pictures?)
 - Demonstration?

Goals for next week (include responsibilities)

- Prepare for Wednesday's presentation (**Michael and Josue**)
 - Take pictures (**Josue**)
 - Get ready for demonstration (**Michael and Josue**)
 - Create presentation (**Michael and Josue**)
 - Practice (**Michael and Josue**)
 - Create timeline (**Michael**)
- Actually get something on the screen this time (**Michael**)
