

Team name: Team SmartMirror

Members present: Michael Dykema, Josue Nunez

Date: 11/8/2020

Time: 9:00pm

Discussion Points:

- Still making good progress. Still on track to complete the project and meet deliverables.
- Merge request will be made tomorrow for r/DiscGolf work **(Michael)**
  - *Might've* been distracted enjoying the last good weekend of the year
- Did manage to look ahead a little more into web-scraping. Shouldn't be too difficult, can probably finish ahead of time. **(Michael)**
- **Finished User Interface for weather module but having problems connecting with API will look more into solutions to fix problem Monday (Josue)**

Goals for next week (include responsibilities)

- Create merge request **(Michael) (Josue)**
- Begin web-scraping **(Michael)**
  - Goal is to have data parsed by next week. Formatting/display will happen after that.
- Look into adding indicator lights if finished with the weather module early as well as adding google assistant. **(Josue)**
