Team name: Team SmartMirror

Members present: Michael Dykema, Josue Nunez

Date: 11/22/2020

Time: 9:00pm

Discussion Points:

- Getting scores from PDGA **(Michael)**
  - Works on event id
  - Need to getting the most recent tournament
- Changed so now developing straight on my machine instead of having to copy the files to the pi, which is a little easier. **(Michael)**
- My Weather module is now fully functioning and running great I should probably change it to display the State initials too instead of it just saying HOLLAND I'll change it to say HOLLAND,MI **(Josue)**
- Merged code for Weather Module to github **(Josue)**

Goals for next week (include responsibilities)

- Finish tournament scores by finding most recent tournament to get scores from **(Michael)**
- Maybe do a little bit of formatting work **(Michael)**

- Finish putting together frame after adjustments made to different monitor that I will be using for lcd Screen **(Josue)**
- Look into adding alexa/google home mini connection modules (**Josue)**
- Look into adding spotify module **(Josue)**
- Be safe while enjoying the holidays with family **(Michael and Josue)**
