Team name: Team SmartMirror

Members present: Michael Dykema, Josue Nunez

Date: 9/27/2020

Time: 9:00pm

Discussion Points:

- Getting the Git repo setup/organization
- Figure out best languages and softwares to make for raspberry pi
  - https://github.com/MichMich/MagicMirror
- Talked about the parts we are going to need to order and materials for the magic mirror, most parts are available on amazon.
- Set standard meeting time to be Sunday's at 8:00pm.
- Josue was able to obtain a monitor for the magic mirror.

Goals for next week (include responsibilities)

- Research MM^2 platform. Figure out the process of installation on a Pi and how to add our own widgets.
  - Both Michael and Josue will install MM^2 on their respective Pi's.
- Figure out frame dimensions for Magic Mirror -Josue
- Be able to describe the process for adding/creating widgets -Michael
